## Produce Frequently Asked Question of the Month

- Q. What is the best feed available for an older horse?
- A. Due to common dental problems that come with age, a specialised feed is definitely recommended for older horses. Mitavite Gumnuts is a specially formulated steam extruded feed with increased palatability, enabling your horse—whether it be older or suffering from dental problems—to digest the maximum nutrition possible, increasing the efficiency of your feed.

*Please speak to the Produce Staff for more info on our range of specialised Mitavite products.*
